## Allowable Subject Matter

- 3. Claims 13-19 allowed.

The following is an examiner's statement of reasons for allowance: None of the prior art cited or reviewed by the examiner teaches or fairly suggest the claimed method for electroless nickel plating, where the metal specimen establishes a state of hydrogen saturation. The closest prior art, JP 2001107254 by Homna et al., only teaches of a metal specimen producing hydrogen in a electroless nickel plating bath, but does not suggest a state of hydrogen saturation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
